Executive Coaching

“Coaching has allowed me to reflect on my Leadership approach, it has given me space and time to think clearly and accept that there is no right or wrong way of Leadership, it has helped me lead with my true self strongly”
(Feedback from a Coachee 2009)

This 1-1 executive coaching programme for school leaders has been designed by Metaphorics. The team have developed a coaching model and an integrated series of tools that school leaders can use to help them develop awareness of; their character and leadership approach, the dynamics of the team and their own personal performance. Typically the programme comprises of between three and six 1-1 coaching sessions in order to discuss your own performance as a leader and the dynamics of the team you lead. The Metaphorics approach to coaching works on developing strengths as well as addressing weaknesses, with the primary focus being on the goals of the coachee. Depending on your requirements, Metaphorics can work with you on a half day basis (£400 plus VAT per session) or they can work around shorter 60 - 90 minute slots (£150 plus VAT per session).

The principles of the coaching programme are;

- To work with leaders in schools to help them enhance their own performance
- To work towards the goals of the coachee
- To provide a confidential process

The number of sessions required is determined by the coachee and this programme would be suitable to anyone in a leadership position within school. If you would like more information about executive coaching then email
